Additional information

Gross Portfolio Returns represent client-specific time-weighted returns (TWR) of the entire portfolio including the deduction of mutual fund expense ratios, purchase/redemption fees, and other security-level expenses, but gross of advisory and service fees applied to the client portfolio.

Client performance inception date is generally the first month-end after initial funding.

Lipper Fund Average performance figures assume the reinvestment of dividends and capital gains distributions. The fund performance percentages are based on fund total return data, adjusted for expenses, obtained from Lipper, a Thomson Reuters Company, and was not adjusted for fees and loads.

Clients invested in Exchange-traded Funds "ETFs" transact at the market price during market trading hours. ETF performance for clients is also based on the market price at close, which may be different than the fund's Net Asset Value.

Market value and returns for individual securities are calculated using the client's daily custodial records. As a result, returns may vary slightly from the official month-end returns of a security as reported on Vanguard.com.

Glossary of risk metrics:

Standard Deviation is a risk measure of dispersion around the mean return.

Tracking Error is a relative risk measure of the standard deviation of excess returns.

Sharpe Ratio is a total risk measure of portfolio reward to variability.

Information Ratio is a relative risk measure of portfolio excess returns and tracking error.

Jensen's Alpha is a systematic risk measure of excess return adjusted for systematic risk.

Beta is a systematic risk measure of the sensitivity of portfolio returns to changes in benchmark returns.

R-Squared is the square of the correlation coefficient and is the proportion of portfolio returns variance that is related to benchmark returns variance.

All investments have risks. **Growth investments** target companies with above-average earnings that may be subject to price volatility if earnings expectations are not met. Although **value investments** target stocks believed to be priced too low, there is no guarantee that they will appreciate. There are risks associated with **international investments** including currency fluctuations, economic instability, and political developments. Additional risks may be associated with **emerging market securities**, including liquidity and volatility. Investing in **small and/or midsize companies** may increase the risk of greater price fluctuations. **Bonds** are subject to certain risks including interest rate risk, credit risk, and inflation risk. As interest rates rise, the price of bonds will fall. Long-term bonds have more exposure to interest rate risk than short-term bonds. Government and agency securities are not guaranteed. **Mortgage backed securities** are subject to prepayment risk. Lower quality bonds may offer higher yields in return for more risk. The value of **REIT shares** is affected by, among other factors, changes in the value of the underlying properties owned by the REIT and/or changes in the prospects for earnings and/or cash flow growth of the REIT itself. In addition, certain risks associated with general real estate ownership apply to REIT investments, including risks related to general and local economic conditions, possible lack of availability of financing, and changes in interest rates.

Past Performance is no guarantee of future results. The value of investments can go down as well as up, and you may not get back the amount you have invested. Investments denominated in a foreign currency will fluctuate with the value of the currency. Certain investments, such as securities issued by small capitalization, foreign and emerging market issuers, real property, and illiquid, leveraged or high-yield funds, carry additional risks that should be considered before choosing an investment manager or making an investment decision.

Investment Manager (Sub-Advisor) performance reflects relevant strategy composite as provided to Mercer by the named investment firm and may not be identical to the performance of the Sub-Advisor within the relevant Mercer strategy due to a variety of factors such as cash flows or custom investment guidelines.
